**Is the Big River Farms Education Program right for me?**

Do I want to be a commercial farmer? (Grow produce to sell, not just for my family)

Am I committed to growing without chemicals and to learning all that is involved in farming sustainably?

Do I have reliable transportation to drive to the farm 2-5 times/week?

Do I have time to commit to being at the farm a minimum of 15-20 hours/week during the growing season (March – October)?

Do I have enough financial resources for the program costs and additional fees? Are there ways to find financial assistance?

Do I like working outside for long hours and have the physical strength and ability required for farming?
